**Falcon
Waterfree
Urinal**

Water is one of our most valuable yet needlessly wasted resources. A waterfree urinal provides a hygienic practical and cost effective alternative. In fact, this technology is being widely used throughout the world in applications ranging from office buildings to sports stadiums.

The urinals, with optional privacy dividers are made from high quality white vitreous china for facility aesthetics. Black or white gel-coated Fibreglass models are also available. Units have special gel coating for improved hygiene.

Vitreous China "Boronia"

Simple, effective design

Constructed from vitreous china or fibreglass reinforced plastic, the urinal has a special gel coating making it totally resistant to urine accumulation and bacteria residue.

Vitreous China "Flax"

Vitreous China "Freesia"

"Flax" with Privacy Divider

The economical environmentally-friendly alternative

Cut away view of SealTrap cartridge

Floating layer of AirSeal liquid seals urine from the atmosphere eliminating smells. Waste discharged into drainage system. Unique baffle ensures AirSeal® lasts the life of the SealTrap® cartridge - up to 15000 uses. No top ups or waste.

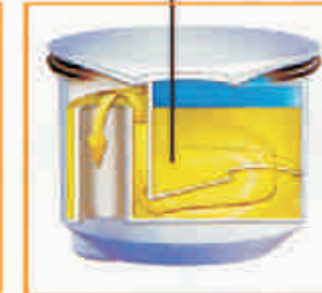

**UNIQUE CARTRIDGE DESIGN
REQUIRES NO ADDITION OF
SEALANT BETWEEN CHANGES**

DIAGRAMS ILLUSTRATE HOW LIQUID SEALANT FLOATS ON WATER...

...AND HOW URINE PASSES THROUGH IT, BECOMING

...SECURELY ISOLATED FROM THE RESTROOM, WHILE PROCEEDING TO THE DRAIN

The Falcon Waterfree Urinal range is one of those rare products that saves money and time, while conserving natural resources. Both new stylish vitreous china shells and fibreglass reinforced plastic model work to save approximately 182 000 litres of water each per year. Plus they help prevent pollutants being discharged into our precious waterways due to the design of the cartridges

The Benefits:

- Available in vitreous china and fibre glass
- Waterfree
- Odourless
- More Hygienic
- Economical
- No Mechanical Parts

These innovative systems have been designed for all types of applications and their extensive range of benefits make them especially suitable for both commercial and public applications..

Available in vitreous china and fibreglass

Vitreous china boys models also available for schools, public amenities and domestic applications

Waterfree

With no water connection required and no flushing mechanisms needed, these units are simple and easy to install in new or retrofit applications. And no more running water means there's less chance of leaking or accidental flooding.

Economical

Falcon Waterfree urinates effectively eliminates water and sewer line costs. Installation costs are also lower because no water supply pipes or flushing mechanisms are required.

Odourless

The unique design means urine is immediately passed through a cartridge which contains a biodegradable sealant liquid, creating a clean, odourfree environment. Integrated buffers in the cartridge ensure that the liquid lasts for the life of the cartridge.

More Hygienic

The touch-free operation guarantees cleanliness and hygiene. Completely replaceable, fully recyclable cartridge acts as a trap for uric sediment and eliminates the need to clean out or perform maintenance on the internal components.

Low Maintenance

Falcon Waterfree urinals reduce buildup and residue in sewer pipes. The Recyclable Cartridge is removed and replaced typically 2-4 times a year with a key (provided). Cleaning is as simple as a wipe-over with an atomizer spray. No liquid top ups needed.

No Mechanical Parts

There's no need to install flushing units and no mechanical or electronic connecting parts, so there's nothing to breakdown or maintain.

Each urinal consists of two main components - SealTrap® and AirSeal®. SealTrap® is the specially constructed ABS polypropylene cartridge and AirSeal® is the alcohol based biodegradable sealant liquid with a citrus fragrance. Urine flows through into the SealTrap® where it is immersed through a floating layer of AirSeal® sealant liquid. This sealant floats and seal the urine from the atmosphere. The efficient SealTrap® design then allows the immersed urine to be discharged into the sewage system.

Warranty

All waterfree urinals (excluding the cartridge) have a guaranteed 5 year full replacement warranty.

Easy Installation
